About me

I am a web developer with over 2 years of experience in React.js, TypeScript, and Tailwind CSS. I've contributed to building a SaaS platform **(UrSlots)** focused on booking nail services, handling both front-end and back-end development.

Work Experiences

Front-end Developer

Gridly | 04/2023 - Present

- I provided ideas for frameworks and libraries for the application to replace outdated libraries, ensuring that we utilized modern and efficient technologies for better performance and maintainability.
- I built several core features of the app, such as merging branches, spell check, recording history, batch QA checks, importing localization, and facilitating real-time discussions.
- Collaborated with the backend team to ensure feature integration, troubleshoot issues, and enhance application functionality.
- Debugged and troubleshot websites, identifying and resolving any issues efficiently

Front-end/Back-end Developer

Start-up (Urslots) | 12/2023 - Present

- Helped build key features of the app, such as authentication, appointment booking, categories, services, working hours, and, most importantly, import/export for bookings, staff, and clients.
- Worked on finding and improving the UI and UX for the app, ensuring a user-friendly and visually appealing design.
- Contributed to both front-end and back-end development to build the startup app, ensuring a cohesive and functional product.

Education

Self-taught
6/2022 - 04/2023

seft-taught

- Acquired foundational knowledge in HTML, CSS, JavaScript, TypeScript, and Tailwind CSS through self-study
- Built a personal project and learned how to deploy it, as well as use Git for version control to manage different versions of the project.

Frontend Mastery
07/2023 - 11/2023

Frontend Mastery Course

Completed the Front End Developer course on Frontend Masters to solidify my knowledge of frontend development.

Learn on Roadmap
04/24 - 07/2024

roadmap.sh

Completed the Front End development roadmap as outlined on roadmap.sh to ensure a comprehensive understanding of frontend technologies.

Projects

Urslots Booking   12/2023 - Present

Description: **UrSlots** is a SaaS platform that streamlines nail service bookings, helping salon owners manage appointments, customer data, and schedules efficiently.

- Team: 2 developer
- Site: https://dev-merchant.urslots.com/
- Technologies : React , Tailwindcss , Typescript , Honojs , Redis , etc.

Taskify   04/2024 - 05/2024

Description : **Taskify** is a task management app inspired by Trello. It allows users to create, update, and organize tasks through an intuitive drag-and-drop interface. Taskify simplifies workflow management, making it ideal for both personal and team projects.

- Team: 1 developer
- Site: https://taskify-app-phong-vu.vercel.app/
- Technologies: Nextjs , Tailwindcss , Typescript , AivenDB , Server Action , etc.

Make Your Link   02/2024 - 03/2024

Description: Simplify your online presence with Make Your Link! Created a personalized page that allows users to showcase all their social media profiles in one place.

- Team: 1 developer
- Site: https://make-your-link.vercel.app/
- Technologies: Nextjs , Tailwindcss , Typescript , Uploadthing, etc.
